PROFILE

As a passionate Full-Stack Developer, I specialize in crafting impactful WordPress solutions, WooCommerce integrations, and Telegram bots tailored to unique business needs. With a strong foundation in PHP, JavaScript, and API development, I create seamless and efficient web applications.

Additionally, I have experience working with React, having built several pilot projects over the past year. While my expertise in React is still growing, I am eager to take on new challenges and expand my skills in modern front-end development.

Self-motivated and growth-oriented, I currently manage large-scale projects as a freelancer. Open to part-time, outsource, or outstaff collaborations, I am also willing to relocate under favorable conditions. Let's build something exceptional together!

EMPLOYMENT HISTORY

Middle Full-Stack wordpress developer, N-iX Games
Aug 2022 — Present
Remote

- Developed over 3 websites which I continue to develop and maintain.
- A minimal set of plugins is used, which ensures an easy and efficient user experience.
- The main functionality is provided by ACF (Advanced Custom Fields) and Yoast SEO plugins for flawless integration and search engine optimization.
- Websites were created using CSS preprocessors and Gutenberg blocks to optimize page structure and increase flexibility.
- Testing and deployment follows a structured process: Dev – Test – Prod, with version control via GitHub for seamless collaboration and tracking.

Middle full-stack developer, WebVatra
Apr 2022 — Jul 2022
Ivano-Frankivs'k

- Several websites were developed featuring unique animations based on FullPage.js sliders and Animation.css.
- User dashboards were also created, including functionality for registration and password recovery.
- Telegram bots were developed for a hotel booking website for travelers and for a food delivery service.
- AJAX requests were utilized for handling data processing and validation efficiently.

Junior Full-stack developer, Efrox
Jul 2021 — Mar 2022
Ivano-Frankivs'k

- Participated in the development of over four websites, including classified boards and rental services. Utilized Google APIs for maps, markers, and geolocation functionalities.
- Developed a custom plugin to support registration for various user types and posts.
- Designed custom email templates for user registration with responsive layouts.
- Additionally, created over three news bots that managed news channels either automatically or semi-automatically.
